Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

VOLUME 9 1908

PAGES

ALLEN, R. B., of Gambier, Ohio. On hypercomplex number systems belonging to an arbitrary domain of rationality 203–218

BIRKHOFF, GEORGE D., of Madison, Wis. On the asymptotic character of the solutions of certain differential equations containing a parameter 219–231

———— Boundary values and expansion problems of ordinary linear differential equations 373–395

BLISS, GILBERT AMES, of Princeton, N. J. (With MAX MASON.) The properties of curves in space which minimize a definite integral 440–466

COBLE, ARTHUR B., of Baltimore, Md. An application of the form-problems associated with certain Cremona groups to the solution of equations of higher degree 396–424

COOLIDGE, JULIAN LOWELL, of Cambridge, Mass. The equilong transformations of space 178–182

DARWIN, GEORGE HOWARD, of Cambridge, England. Further note on Maclaurin's spheroid 34– 38

DICKSON, LEONARD EUGENE, of Chicago, Ill. Representations of the general symmetric group as linear groups in finite and infinite fields 121–148

DRESDEN, ARNOLD, of Chicago, Ill. The second derivatives of the extremal-integral 467–486

EISENHART, LUTHER PFAHLER, of Princeton, N. J. Surfaces with isothermal representation of their lines of curvature and their transformations 149–177

GRIFFIN, FRANK LOXLEY, of Williamstown, Mass. Certain periodic orbits of k finite bodies revolving about a relatively large central mass 1– 33

KELLOGG, O. D., of Columbia, Mo. Potential functions on the boundary of their regions of definition 39– 50

———— Double distributions and the Dirichlet problem . . . 51– 66

MASON, MAX, of Madison, Wis. (With GILBERT AMES BLISS.) The properties of curves in space which minimize a definite integral 440–466

PAGES

MILLER, G. A., of Urbana, Ill. Groups defined by the orders of two generators and the order of their commutator 67– 78

———— On the holomorph of the cyclic group of order p^m . . 232–236

MOORE, ROBERT L., of Evanston, Ill. Sets of metrical hypotheses for geometry 487–512

RANUM, ARTHUR, of Ithaca, N. Y. Concerning linear substitutions of finite period with rational coefficients 183–202

RICHARDSON, R. G. D., of Providence, R. I. The integration of a sequence of functions and its application to iterated integrals 339–372

ROEVER, WILLIAM H., of Boston, Mass. Brilliant points of curves and surfaces 245–279

UNDERHILL, ANTHONY LISPENARD, of Madison, Wis. Invariants of the function $F(x, y, x', y')$ in the Calculus of Variations 316–338

VAN VLECK, EDWARD B., of Madison, Wis. On non-measurable sets of points, with an example. 237–244

VEBLEN, OSWALD, of Princeton, N. J. Continuous increasing functions of finite and transfinite ordinals 280–292

WILCZYNSKI, E. J., of Champaign, Ill. Projective differential geometry of curved surfaces (second memoir) 79–120

———— Projective differential geometry of curved surfaces (third memoir) 293–315

WILSON, EDWIN BIDWELL, of Boston, Mass. On the differential equations of the equilibrium of an inextensible string. . . . 425–439
